

Del C:

$$D = 5.0 \text{ cm}$$

$$f = 10.0 \text{ cm}$$

$$\lambda_r = 700 \text{ nm}$$

c1) Airys kiven:  $\frac{d}{2} = \frac{1.22 f \lambda}{D}$

$$d = \frac{2.44 \cdot 10.0 \text{ cm} \cdot 7 \cdot 10^{-5} \text{ cm}}{5 \text{ cm}} = 3.42 \cdot 10^{-4} \text{ cm} \\ = 3.42 \mu\text{m}$$

c3) Vi har  $D = d + 2d \frac{1.22 \lambda}{d}$

$$\Rightarrow D = 5 \text{ mm} \Rightarrow 5 \text{ mm} = d + 20000 \text{ mm} \cdot \frac{1.22 \cdot 0.0007 \text{ mm}}{d}$$

$$\Rightarrow \frac{d}{5 \text{ mm}} = \frac{d}{d} + \frac{17.08}{d} \Rightarrow d^2 - 5 \text{ mm } d + 17.08 = 0$$
